

Training to become an Aircraft Electronics Technician with Lufthansa Technik AG

Trying to guarantee smooth air traffic without the use of modern electronics is unthinkable.

Dozens of onboard computers make up the aircraft's brain. Highest technical quality, dependable inspections, and perfect maintenance are therefore indispensable. As an Aircraft Electronics Technician you are responsible for the examination, repair and initiation of all electrical and electronics devices in an aircraft. You lay and connect cables, overhaul them or exchange entire cable forms. You check electronic components, analyze and repair malfunctions. You assemble electronic components to create modules and install them in aeronautical devices. You work independently according to drawings and regulations which are often written in English.

If you are interested in electrical and electronic procedures then: welcome to the Lufthansa Base!

Facts

- Within 3 ½ years you will receive first class training from Lufthansa Technik AG to become an Aircraft Electronics Technician.
- Your practical training takes place at the Lufthansa Base in Hamburg or Frankfurt. Your theoretical training at vocational school is enhanced by additional in-house courses.
- In your first training year you will learn the basics of mechanics and electronics as well as the proper handling of tools.
- In your second training year by taking part in project tasks you will acquire substantial knowledge and skills in the areas of electro, digital and analogous technologies, sensors, measurement techniques, and aircraft electronics.
- The third year training takes place in aircraft maintenance and overhaul.
- During your training you could also assist at other national locations for several weeks.
