

Training to become an Aircraft Mechanic in Maintenance Technology with Lufthansa City Line

Do you show enthusiasm for mechanics and technical details? Do you find it challenging to search for the perfect solution and do you enjoy teamwork? – Then let us qualify you for fascinating tasks in the area of aircraft maintenance.

Lufthansa City Line GmbH places the highest priority on the perfect functioning of their aircraft and their appropriate systems. As an Aircraft Mechanic in the field of Aircraft Maintenance, you can use your know-how and craftsmanship to ensure the smooth technical operation of our aircraft.

You will work in a team and complete maintenance and overhaul tasks. Among the skills you will acquire are the set-up and function of aircraft, searching for errors, repairing, dismantling, assembling, and testing the individual components of various aircraft systems. You will work independently according to manufacturer documentation, which is in English. Since we need your expertise round the clock, working in shifts is a matter of course for you.
