

Training to become an Aircraft Mechanic in Engine Technology with Lufthansa Technik AG

The engine is the heart of an airplane. Faultlessly-running engines are essential for the safety and smooth-running of a flight. As an Aircraft Mechanic in the Engine Technology field, you are responsible for mounting the engines and ensuring that they are maintained, repaired and ready for operation at all times. You will assemble individual components into groups, engine modules or entire engines according to technical drawings. During general overhaul, you will completely dismantle the engine to inspect it and replace parts, and then reassemble it. You will work independently with drawings and regulations which are often written in English.

If you are inspired by precision and the responsibility for the heart of the machine then: welcome to the Lufthansa Base!

Facts

- Within 3 ½ years you will receive first class training from Lufthansa Technik AG to become an Aircraft Mechanic in Engine Technology.
- Your practical training will take place on the Lufthansa Base in Hamburg. Your theoretical training at the vocational school will be enhanced by additional internal courses.
- You will learn the assembly and function, inspection, dismantling and testing of aircraft engines.
- In your first year of training in our training shops you will acquire basic knowledge in metalworking and the professional handling of tools.
- Your assignments in the repair shops and directly at the aircraft will start in your second year of training; you will be accompanied by experienced technicians.
- If you show particularly good results during your qualification, you will also assist at other national locations for several weeks.
