

Training as an Aircraft Mechanic in Overhaul Technology with Lufthansa Technik AG

The highest priority for Lufthansa is the perfect functioning of their aircraft and their systems. As an Aircraft Mechanic in Overhaul Technology, you will use know-how and sure instinct to ensure safety during take-offs, flights, and landings. You will work in the aircraft inspection team, carry out maintenance and overhaul tasks, monitor and repair. You will assemble individual components into functional partial systems and install them in the aircraft. You will work independently with drawings and regulations which are often written in English. Since your knowledge is required round the clock, working shifts is a matter of course for you.

If you are interested in a responsible profession with the highest demands on safety then: welcome to the Lufthansa Base!

Facts

- Within 3 ½ years you will receive first class training from Lufthansa Technik AG to become an Aircraft Mechanic in Overhaul Technology.
- Your practical training will take place at the Lufthansa Base in Hamburg. Your theoretical training at the vocational school will be enhanced by additional internal courses.
- You will learn the assembly and function of aircraft, as well as searching for faults, repairing, dismantling, assembling, and testing of individual parts in various aircraft systems.
- In your first year of training in our training shops you will acquire basic knowledge in metalworking and the professional handling of tools.
- Your assignments in the aircraft component repair shops and directly at the aircraft will start in your second year of training.
- During your training you could also assist at other national locations for several weeks.
