

## Training to become an Aircraft Mechanic in Production Engineering Technology with Lufthansa Technik AG

Air transportation not only demands careful planning and quick reactions, but also safety by way of the highest technical quality. As an Aircraft Mechanic in the Production Engineering Technology field, you are responsible for our aircrafts' constant readiness and their safety. You will repair and produce spare parts for tail units, wings and airframes, and you will know every flick of the wrist when installing landing flaps, doors or cabin equipment. You will work independently with documentation and regulations which are often written in English.

If you are interested in a responsible profession with the highest demands on precision then: welcome to the Lufthansa Base!

### Facts

- Within 3 ½ years you will receive first class training from Lufthansa Technik AG to become an Aircraft Mechanic in Production Engineering Technology.
- Your practical training will take place at the Lufthansa Base in Hamburg. Your theoretical training at the vocational school will be enhanced by additional internal courses.
- You will learn to process materials such as titanium, plastic, and aluminum and how to assemble them to become part of the aircraft structure.
- In your first year of training you will acquire basic knowledge in metalworking and the professional handling of tools in our training shops.
- In your second year of training you will begin your assignments in our repair shops and directly at the aircraft.
- If you show particularly good results during your qualification, you may also assist at other national locations for several weeks.

## Requirements
