

Training to become a Tool Mechanic with Lufthansa Technik AG

Since safety is Lufthansa's top priority, the highest technical precision is required when dealing with the making, repairing or checking of aircraft components. Here, precise craftsmanship and expertise are still a must. As a Tool Mechanic you are the sought-after specialist for all tasks which require particular craftsmanship. You will make and process aircraft components, devices or tools, mount individual parts into complete components while checking their functionality and compliance with measurement and quality guidelines. You will also become firm in the usage of conventional and computer-based tool machines. You will develop relevant working programs for them, prepare the appropriate mechanical processing, and complete it. You will work independently with documents which are often written in English.

If you are interested in a responsible profession, along with precision and craftsmanship then: welcome to the Lufthansa Base!

Facts

- Within 3 ½ years you will receive first class training from Lufthansa Technik AG to become a Tool Mechanic.
- Your practical training will take place on the Lufthansa Base in Hamburg. Your theoretical training at the vocational school will be enhanced by additional internal courses.
- You will learn the processing of aviation construction components both by hand and by way of mechanical and computer-based lathe and milling machines.
- In your first two years of training in our training shops you will acquire basic knowledge in metalworking and the proper handling of tools while reinforcing your know-how through job-related project work.
- As of your third training year your assignments will take place directly in our shops which are responsible for the making and repairing of aircraft construction components and engine parts.
- If you show particularly good results during your qualification, you will also assist at other national locations for several weeks.
