

# Training to become a Cook

During your training to become a Cook, aside from learning how to produce international dishes you will also find out how to use modern kitchen techniques and appliances. You will furthermore gain extensive insight into catering processes and become adept at creating a menu plan, presenting products, and advising guests. Adhering to hygiene and quality assurance standards is as much part of your qualification as material disposition and the calculation of costs and prices.

## **Facts**

- You will be qualified to become a Cook within 3 years.
- At vocational school, you will acquire extensive theoretical knowledge that will be complemented by internal training measures.
- Your practical training will take place in the relevant apprenticeship company.
- During your qualification to become a Cook you will learn the professional preparation and presentation of high-quality fare for every occasion.

## **Requirements**

- Good General Secondary Education or Secondary School Certificate
- Team-capable, independent and showing initiative
- Creative
- Well-groomed appearance, hygiene and quality conscious
