

Training as a Bachelor of Science in International Business Information Technology with Lufthansa Systems

Your performance and ideas are convincing and you are open to new cultures! You have a knack for foreign languages and would like to spend part of your training time abroad!

Then combine your internationally-aligned Business Information Technology studies at the Mannheim University of Cooperative Education and practical training with one of the worldwide largest providers of IT solutions.

The bilingual course of study supplements the information technology content with special international business features. The main focus is put on such necessary abilities as expertise, methodological competence, linguistic skills, soft skills, and intercultural competence.

As a Bachelor of Science in International Business Information Technology (BA) you will be able to competently support the management of internationally-operative companies in all concerns. After completing your studies, a variety of tasks at the interface between business management and information technology, will be available to you.

Facts
